

Sustainable Growth through QFN Reinvention

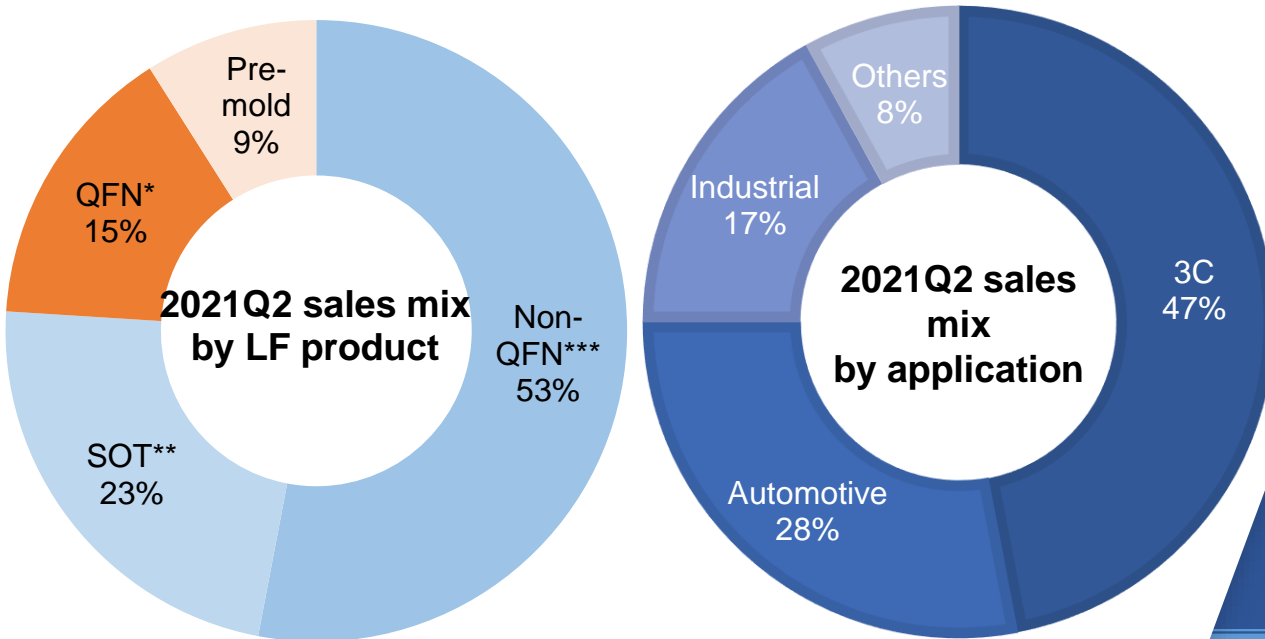

2021 Investor Presentation
Canon Huang, Chairman of CWTC (6548 TT)

Forward-looking Statement

Information included in this press release that are not historical in nature are "forward looking statements". CWTC cautions readers that forward looking statements are based on CWTC's reasonable knowledge and current expectations and are subject to various risks and uncertainties. Actual results may differ materially from those contained in such forward looking statements for a variety of reasons including without limitation, risks associated with demand and supply change, manufacturing and supply capacity, design win, time to market, market competition, industrial cyclicalities, customer's financial condition, exchange rate fluctuation, legal actions, amendments of the laws and regulations, global economy change, natural disasters, and other unexpected events which may disrupt CWTC's business and operations. Accordingly, readers should not place reliance on any forward looking statements. Except as required by law, CWTC undertakes no obligation to update any forward looking statement, whether as a result of new information, future events, or otherwise.

A Leading LF Solution Expert Covering All Applications

- Ticker: 6548 TT
- Market Cap (July 31th, 2021): US\$1.3bn
- Taiwan No.1 and Global Top 2 IC Lead Frame (LF) Supplier
- Client Scope: Outsourcing Semiconductor Assembly & Testing (OSAT), Integrated Device Manufacturers (IDM) and IC Design

30+ years Lead frame experience

US\$345mn 2020 Total sales

90+ No. of global LF patents

1,800+ No. of global employees

*QFN: Quad-Flat No-Leads. ** SOT: Small-Outline Transistor.

*** Non-QFN includes SO, SOP, TSSOP, TSOP, COL, QFP, TQFP, LQFP and PDIP

Target World's No.1 LF Supplier in Five Years

- Through **QFN reinvention**, CWTC will efficiently expand its capacity to pursue **sustainable growth**. With estimated **5-year sales CAGR 20%**, CWTC targets to become the world's largest IC LF supplier with **30% market share by 2025**.
- CWTC targeted to be the IC LF **Spec. Definer**.
- After acquiring LF business from Sumitomo Metal Mining (5713 JP) in 2018, CWTC is the world's top 2 IC LF supplier with 11% market share. Through its plants in Taiwan, China and Malaysia, CWTC owns industry-leading manufacturing capabilities of stamping, etching and electroplating.

2020E Global LF market shares*

*Source: Company data. Stock tickers: Mitsui High-tec: 6966 JP, Shinko: 6967 JP, HDS: 195870 KS, SDI: 2351 TT, ASMPT: 522HK, JLT: 5285 TT

Agenda

QFN Reinvention

Sustainable Growth

Our Commitments to Shareholders

Financial Performance

QFN Reinvention

What is LF?

- LF is the **metal substrate** inside a chip package that carry signals from the die to the outside.
- LF is the interface between die and PCB, communicating signal input/output (I/O).
- By removing material from a flat plate of copper, LF are manufactured by two major processes: etching (for high I/O density with small footprint) or stamping (for less variety orders).
- There are more than dozens types of LF-based IC packages, each characteristic varying based on user requirements.

Source: Analog Device and ResearchGate

What is QFN?

- As one type of LF-based packaging, QFN is a small sized “near chip scale” plastic encapsulated IC package.
- QFN is an ideal package for IC applications where **no. of I/O, size, weight, thermal and electrical performance** are important.

QFN LF

QFN IC package

Source: CWTC and ASE

We Reinvented QFN to Drive Our Future Growth

I. Packaging Type Reinvention

QFN would be the top 1 IC packaging type in terms of no. of IC

II. Manufacturing Process Reinvention

Self-developed technologies leads to our highest efficiency in LF industry

III. Application Reinvention

The most competitive full-QFN solutions for multiple applications

IV. Client Service Reinvention

TW, CN and MY fabs to serve world's tier-one IC design, OSAT and IDM

I. Packaging Form Reinvention

“QFN was invented in 1998. Now CWTC have reinvented QFN and expect it to dominate IC LF packaging since 2021.”

- Canon Huang, CWTC Chairman

QFN is the Answer for All IC LF Packaging

QFN is the best IC LF platform for **higher I/O**, **smaller form factor**, **better thermal conductivity** and **faster electrical signal transmission**.

The Number of QFN-Packaging IC is Increasing

Same with industry trend, we've seen more global tier-one customers adopting QFN as their preferred IC packaging type, replacing SO, BGA and QFP.

Source: ITRI

II. Manufacturing Process Reinvention

“By reinvent QFN manufacturing, we define industrial specification to meet clients demand in the most efficient manner.”

- Canon Huang, CWTC Chairman

We Plan to Dominate QFN with Manufacturing Advantages

Etching

- Precise QFN half-etching technology to enhance efficiency
- **Highly-automated, customized and flexible** etching tools to share with QFP LF lines
- No stamping tool cost and high copper utilization than QFP LF
- Industry leading **wastewater treatment technology**

Increase
33+%
efficiency

Electro-Plating

- Self-developed **plating mask** process covering from high-end to low-end QFN
- High flexibility to switch different products.
- Self-developed photo-mask production line will be available in 2Q21

To cover **80%**
high-end photo-
mask plating QFN

Pre-Mold

- Self-developed **molding process** to provide value-add to QFN LF
- **Increasing pricing power** for niche QFN applications: Mini LED

3x~5x ASP
vs. QFN

III. Application Reinvention

“We’re ready to meet strong demand from 5G, EV, HPC/IoT and Mini LED. Our Full QFN product portfolio cover 80% of IC I/O requirement.”

- Canon Huang, CWTC Chairman

We Reinvent QFN for Various Applications

Connectivity: 5G & WIFI

High-Performance PC (AI) Peripherals

Electric Vehicle (EV)

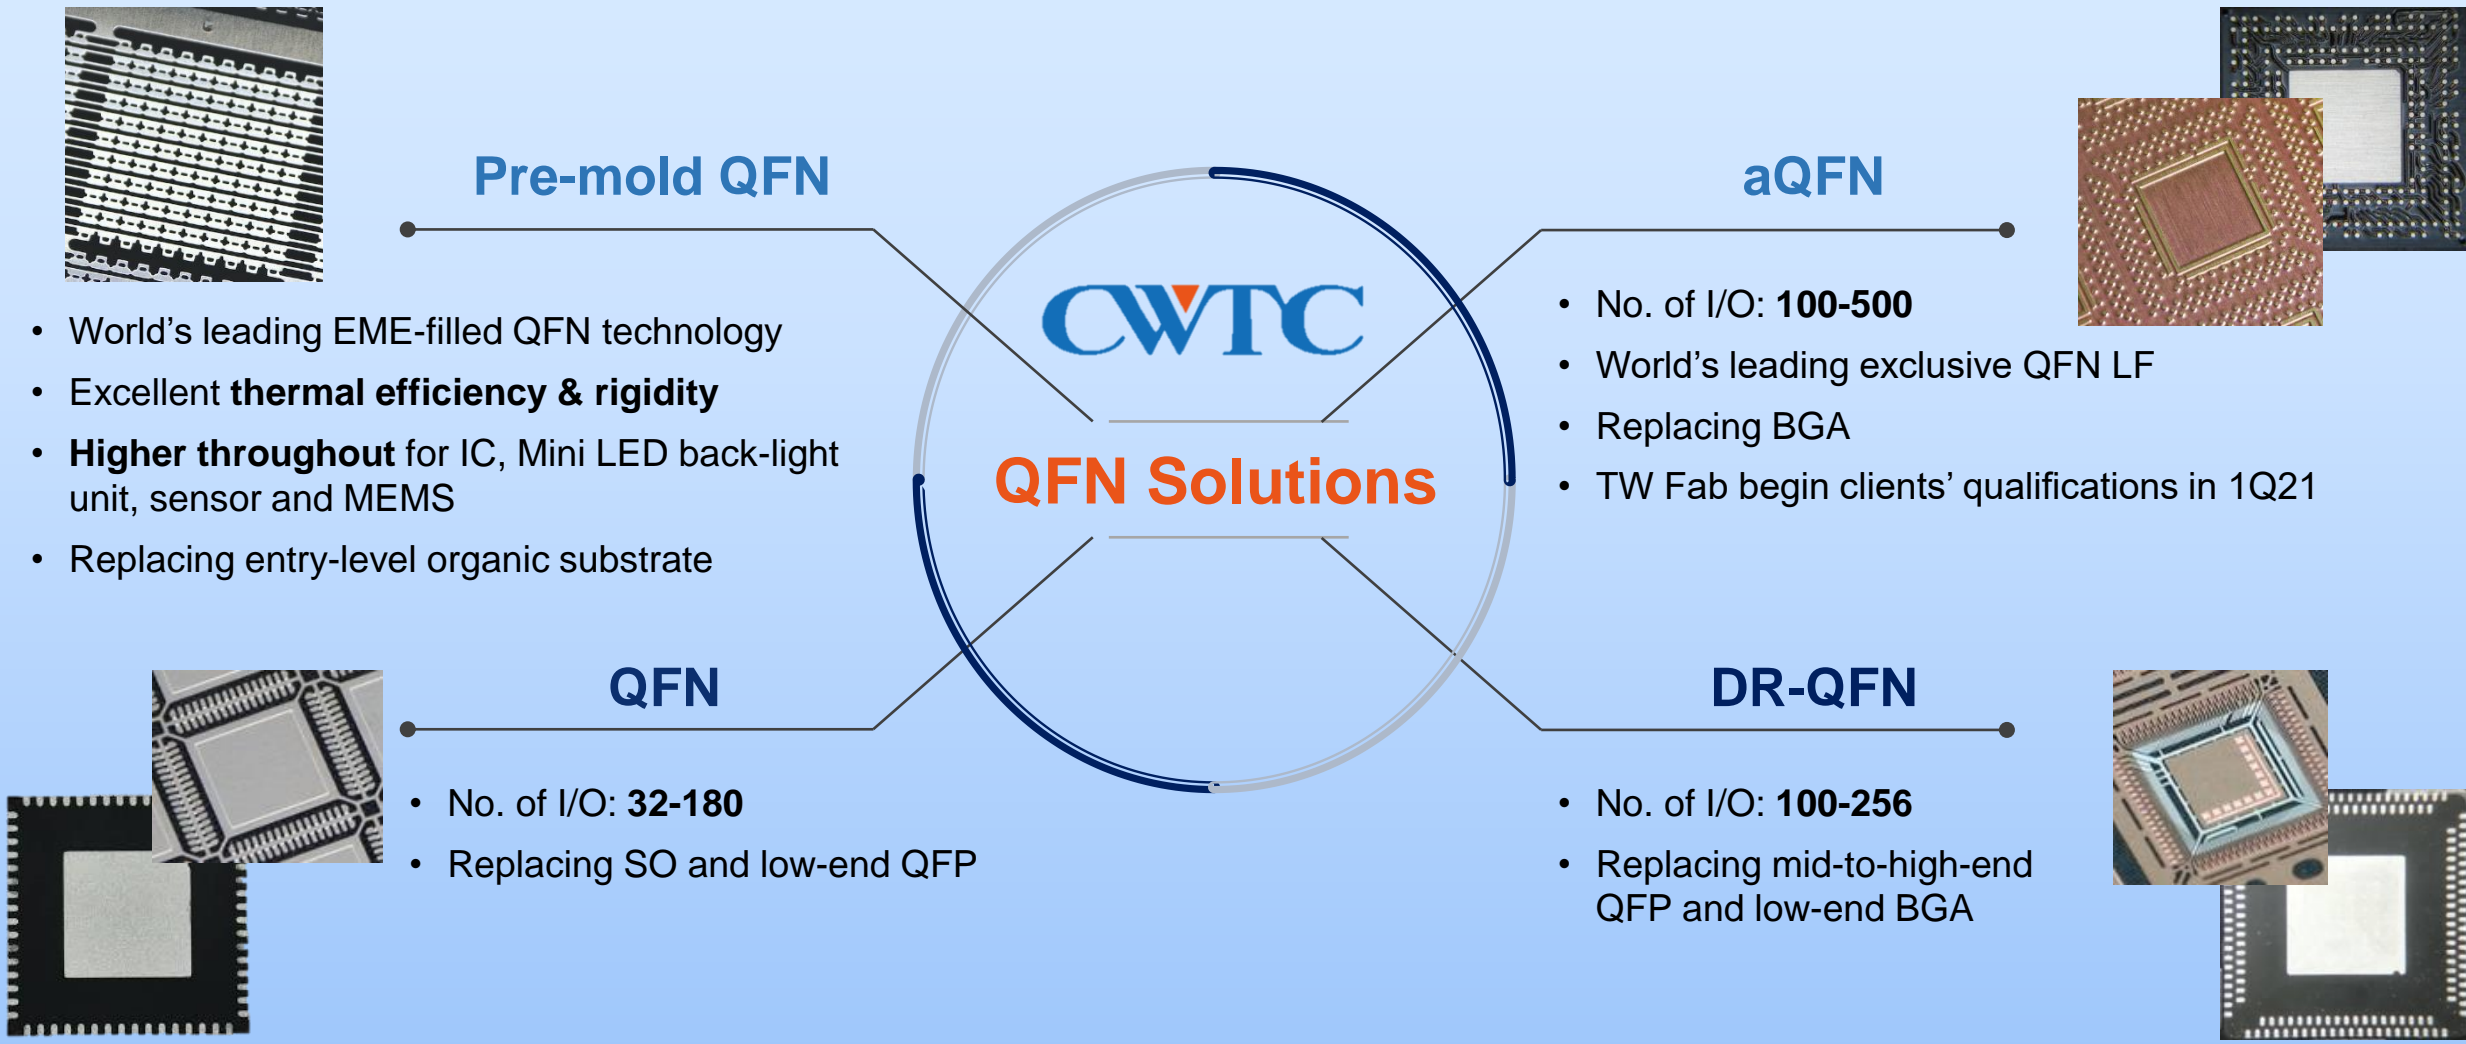

Industrial (IoT)

Mini LED

Full QFN Solutions Covering More than 80% of IC Applications

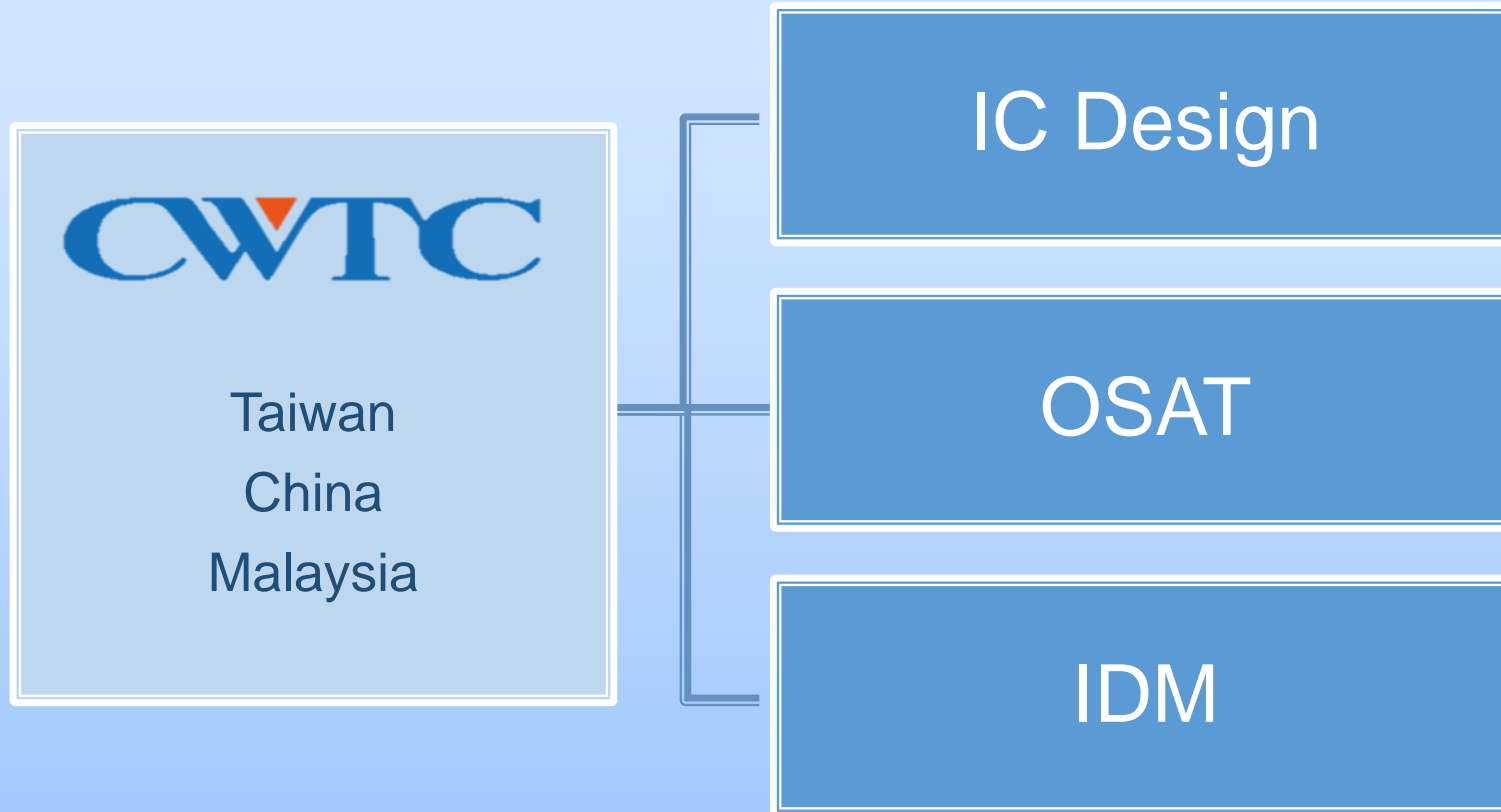

IV. Client Service Reinvention

“Our Taiwan, China and Malaysia factories provide real-time services for global tier-one IC design, OSAT and IDM customers.”

- Canon Huang, CWTC Chairman

We Have the Most Extensive Client Coverage

Our Asia factories are at the hub of global semiconductor supply chain. We provide industry-leading IC LF to serve more than 50 global tier-one clients.

A close-up, blue-tinted photograph of a microchip or integrated circuit. The chip's surface is covered in intricate patterns of metal traces and various components. The text "Sustainable Growth" is overlaid in the center in a bold, white, sans-serif font.

Sustainable Growth

Our Capacity Expansion Leads to Market Share Gain

- QFN capacity: we plan to expand QFN capacity from 18mn units/year, 2020, to more than 130mn units/year, 2025.
- Increasing market share: we target to increase CWTC's QFN market share from 10% in 2020 to 30% in 2025 while our LF market share would increase from 11% to 30%.

We Pursuit Our Sustainable Growth in an Eco-friendly Approach

- Environment:
Increasing recycled water usage from 13.6% in 2019 to **16%** in 2021E.
- Green Energy: 4% electricity of new factory will come from solar energy vs. existing factory only 0.3%.
- Social: We committed to complying with the Responsible Business Alliance (RBA) and the Global e-Sustainability Initiative (GeSI), including the Responsible Minerals Initiative (RMI).
- Human Resource: Our new fab would create more than **150** of job opportunity. We implement ESH standard across our Asia factories.

Our Commitments to Shareholders

We Aim to Produce the Highest Return in the IC Manufacturing Industry

Through efficient investment in capex and QFN reinvention, we expect to outgrow the semiconductor manufacturing industry and deliver an ROE in excess of 20% from 2021E to 2025E.

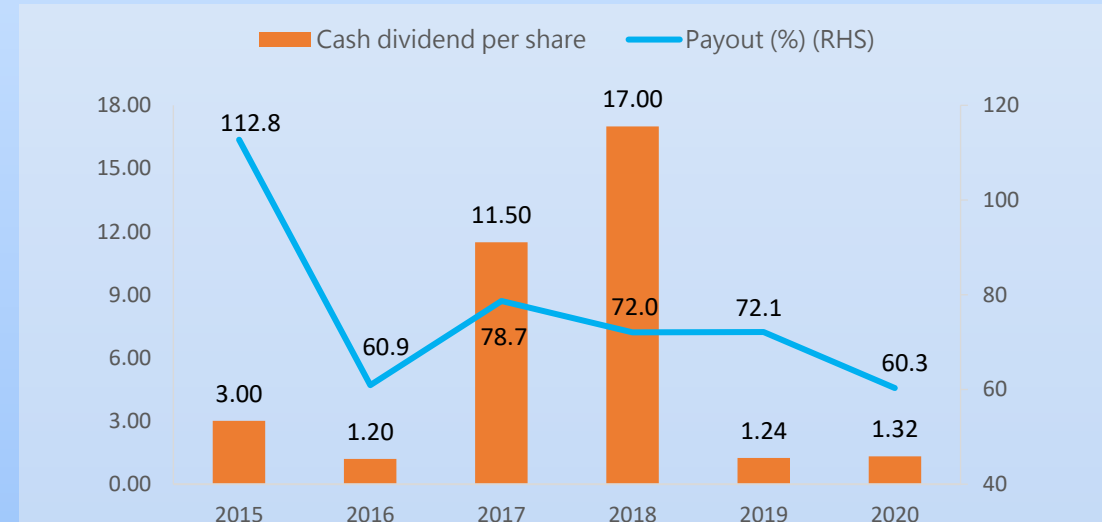

2020E-2025E	Capex-to-Sales ratio	Capex Efficiency*		Sales CAGR	GP CAGR	FCF CAGR
CWTC	Mid-to-High single digit%	2~3x		<i>Above Industry Average</i>		
Foundry	36%	0.4x		14%	14%	12%
OSAT	11%	1.0x		7%	8%	24%

* Capex efficiency: Additional sales in year N+1 / capex in year N

Source: Bloomberg and Gartner. Foundry including TSMC, UMC, VIS while OSAT includes ASE, Powertech, KYEC, Chipbond, ChipMOS and Greatek

Financial Performance

Robust Financial Performance

*Since Sep. 9th, 2019, CWTC changed the par value of stock from NT\$10 to NT\$1. The EPS and dividend are one-tenth of the original numbers.

Glossary

- SO/SOP: Small Outline and Small Outline Package
- TSSOP: Thin Shrink Small Outline Package
- TSOP: Thin Small Outline Package
- COL: Chip-n-Lead
- QFP: Quad Flat Package
- SQFP: Small Quad Flat Package
- TQFP: Thin profile Quad Flat Package
- LQFP: Low profile Quad Flat Package
- PDIP: Plastic Dual In-line Package
- PLCC: Plastic Leaded Chip Carrier
- VSO: Very Small Outline Package
- PMFP: Plastic Micro Flat Package
- BCC: Bump Chip Carrier

- QFN: Quad Flat No-lead
- DRQFN: Dual Row Quad Flat No-Lead Package
- aQFN: advanced Quad Flat No-lead
- VQFN: Very Thin Quad Flat No-lead Package
