Chang Wah Technology (NT$0.4 par value per share)

Consolidated Revenue Press Release for October 2026

Publisher: Chang Wah Technology
Publish Date: November 5, 2026

Chang Wah Technology Co., Ltd. (CWTC, TPEx: 6548) today announced consolidated revenue of NT$1.715 billion in October 2026, representing a slight increase of 0.09% MoM and a significant increase of 50.83% YoY. Cumulative consolidated revenue for the first ten months of 2026 reached NT$14.621 billion, up 32.17% from the same period last year.

Taking into consideration factors such as China's National Day holiday and some customers' advance orders in September, CWTC's October revenue recorded a modest increase compared with the previous month. In terms of end-market applications, CWTC continues to benefit from a diversified product portfolio and broad application exposure. Demand from AI and data centers remained stable, while emerging applications such as automation, robotics, and low Earth orbit (LEO) satellites also continued to generate demand. The automotive market has shown a gradual recovery on a quarterly basis, with demand from international IDM customers and Taiwan-based semiconductor packaging companies also increasing quarter by quarter.

CWTC's capacity utilization remains at a high level, with certain production capacities operating under relatively tight supply conditions. To accommodate evolving customer demand and optimize capacity allocation, CWTC is gradually expanding its production capacity in the short term by installing additional equipment at its existing facilities, thereby enhancing its supply capabilities and operational flexibility.

Looking ahead to the fourth quarter, CWTC maintains the outlook presented at its investor conference last month. Supported by demand from AI, data centers, power management, automotive, and industrial control applications, the Company expects to sustain the growth momentum achieved in the third quarter, with overall performance anticipated to exceed historical seasonal levels.

About Chang Wah Technology (6548 TT):

Chang Wah Technology (CWTC, 6548 TT) is a global professional IC lead frame supplier. Through its plants in Taiwan, China and Malaysia, the company produces lead frames for IC packaging through stamping, etching and electroplating processes. CWTC's lead frame products are widely used in global semiconductor applications, including consumer electronics, automotive and industrial.

Founded in 2009, CWTC manufactures, develops and sells IC lead frame packaging materials to serve first tier global IC packaging companies and vertically integrated manufacturers. CWTC will continue to implement its strategy of capacity expansion and M&A to pursue long-term sustainable revenue growth. We target to become the lead frame supplier with the capability of defining global lead frame industry specification.
